As a Front-End Developer, I approach projects with deep passion and commitment, viewing them not merely as job responsibilities but as a personal mission to drive business success. With the diligence and care of an entrepreneur, I strive to achieve organizational goals. Adopting an open mind and a learning-oriented mindset, I continuously align my skills with cutting-edge technologies. I see challenges as opportunities for innovation and adopt an analytical approach to deliver sustainable solutions addressing root causes. This strategic perspective, combined with my expertise, enables me to add distinct value. I create dynamic, optimized, and user-centric interfaces that benefit teams and projects.

EXPERIENCE

Lenoos, Fulltime — Senior Frontend Developer

January 2025 -

Implement and Integration for several forms that were designed already in figma for ERP and E-commerce systems.

All Modules are separated and dynamically loaded to decrease package size and increase the user experience performance using Vue 3 and Quasar framework.

Varzeshe Ma, full time —Mid Senior Frontend Developer

May 2020 - August 2022

I am actively developing complex application forms by vue 3 and quasar to handle live sport matches reporting.

Atisun, full time —Mid Senior Frontend Developer

July 2019 - April 2020

Development of in-bank application forms and also receiving reports from bank managers with Stimulus Soft.
